REDUCE THE EFFECTS OF TIME ON THE SKIN

Using a combination of Dynamic Ionisation, Thermal Energy and Lifting Stimulation, Guinot's patented technology will allow you to achieve visible, clinically proven results after just one treatment.

THE SCIENCE

Every 28 days, the skin begins its own growth cycle. As we age, the cells become sluggish and the regeneration process slows down in accordance to our metabolic rate. Using Hydraderm Cellular Energy's Dynamic Ionisation, the energy within the skin cells is reawakened, whilst speeding up the enzyme which is responsible for repairing damage and stress caused to the skin.

Combining this Dynamic Ionisation with Thermal Energy, the oxygen level within the skin is increased, cellular regeneration is accelerated and toxins are eliminated, revealing a brighter, more youthful complexion.
